# THE WORLD NEED US!

From our founding year of 2016 to today ; With our blockchain-based projects, we have developed 4 projects that center trade and aid. They are in order ; Our cryptocurrency which is Based on ERC20 ; "intecoin". 'Acceptance points' where the payment system "intepay" will be used. Initially only "intecoin" is used and many currencies can be used in the future, open to advanced architecture, c2c marketplace 'intexplace' and, with the realization of our projects, "intexcharity", which will provide sustainable life support for the homeless in the first place.

While all of these projects will benefit both the growth and earnings of the community, it will also enable us to realize sustainable activities for homeless people with the support of our community, which is intexcharity volunteers. In our opinion, perhaps the most important of our projects is intexcharity aimed at reducing homelessness and poverty. It is open to the free participation of all who wish. Intexcharity has the potential to be a model for ideas and suggestions such as the World Citizenship Salary, which is very popular today.

Automation systems, artificial intelligence technology, and Paradigm Shift which becomes more evident with Covid-19;

Since the early days when we started this journey; We had some goals and predictions for today. But in these predictions; Of course, there was no prediction that there would be a global epidemic and that we would be trapped in our homes to survive. With this situation, which is an important test for our civilization, we have seen how important our work is and how many people will keep them in life when our solutions are implemented.

We do not claim to have found the best solutions. We adapted proven ideas to blockchain and created an ecosystem that is very effective and open to development.

While we feel sorry for the process and the people we lost, on the other hand, we have contributions to the new norm; which gives us strength and energy to help us overcome difficulties.

**Intecoin**

# About Us

## COMPANY INFORMATION;

IntexGlobal Internet LTD. STI

**Establishment:** January 2016 / Izmir – Turkey

Kordon Tax Office.

**Tax Number:** 4780555958

**Trade Record Number:** 186186

**MERSIS Number:** 9658274712754670

Pakistan July 2017 / Islamabad - Pakistan

Future Goals: After the 4th quarter of 2020, American and European headquarters of our company will be established.

Web site's and Portal : [www.intexcoin.io](http://www.intexcoin.io) | [www.intexpay.io](http://www.intexpay.io) | [www.intexcharity.org](http://www.intexcharity.org) | [www.intexplace.io](http://www.intexplace.io)

## IntexGlobal Internet LTD. STI.

Using blockchain and internet technologies at the beginning, making profit both with its commercial projects; is a community of international companies that produce sustainable, non-profit solutions for social and environmental issues.

## Our vision and objectives;

By establishing a new ecosystem based on trust, community strength and economic freedom, to ensure the valuation of our cryptocurrency, Intexcoin, and to make it a reliable currency used all over the world. In addition, we aim to fulfill our responsibility to our world by realizing Intexcharity, a large and sustainable life support project that covers other currencies besides Intexcoin.

**In order to achieve our goals;** we are doing and developing all processes, including projecting and software, in our own structure. We also collaborate with many partners and developers who bring alternative ideas and suggestions to achieve stronger and bigger goals.

# Problem

Humanity has made great progress until today. However, with the development, it has now produced major problems that are close to almost impossible to solve. And it keeps producing. Humanity; With its current functioning, it is not only its own line; it also jeopardizes the entire life cycle. It has led to the extinction of many living species, destruction of nature and disruption of its life cycle. With the common opinion of almost everyone and the common diagnosis of scientists, we see that we are about to come to an end, and we are even experiencing this situation with anxiety. There is no sustainable solution proposal regarding climate change, extinct species, wars, energy and clean water problem, nutrition and agriculture problem, increasing unemployment due to technological development and how to solve social problems. (robotic technology, autonomous systems and artificial intelligence, etc.) From this point of view, the situation is pretty dire.

When we look at these problem areas and their relationship and causality with each other, the point we have reached is; money and its devastating effects. Even though money is shown as the main source of all evil, the problem is not in the money itself. Problem; it is the waste of unsustainable resources that the world has come to, giving it this destructive feature, and the ambition to have profit and power fueling the frenzy of consumption. As it is known, fiat coins (dollars, euro, lira) are produced under the control of states. Who will produce how much is again planned in the big economy. Money printing for the last century is now unrequited and based solely on trust. A planning can no longer be mentioned. With the pandemic, this unsustainable situation came to light.

The economic size of the world is about 350 trillion dollars. This figure is more than enough for 8 billion people. Unfortunately, this is not the case. Half of the world's economic size is in the hands of 10%, while the remaining half is 90%. This distorted distribution constantly puts the world into global crises; leading to war and regional problems.

People are now living under the bondage of money and have lost their freedom and self. This situation also brings with it crime and social explosions. This is the most basic and quick problem that should reach a fair solution.

Intexglobal makes an important contribution, to solving this ball of problems for a fair and well-needed humanity that we all should have.

The problem concerns us all, and the solution of it will be with the contributions of all of us.

We will consider the problem in three main axes.

We will consider the problem in three main axes.

- 1) The general state of the blockchain ecosystem
- 2) The problem of the cryptocurrency ecosystem
- 3) Problems In Aid And Donation Activities;

### **1.GENERAL STATE OF THE BLOCKCHAIN ECOSYSTEM**

A problem cannot be mentioned for Blockchain, but perhaps it can be criticized that it is not aimed at more daily life. With its approximately 12-year history, Blockchain brings an important and unshakable solution to the problem of trust in many areas. However, complex work focused on infrastructure solutions was discovered to be solved in decentralized structure and consensus. But thanks to the very valuable and superior features of blockchain technology such as cost savings, quality and safety; the real potential for products to emerge in many areas has not yet been noticed. When we consider the causes of this situation, perhaps the main reason is that; Blockchain technology is overshadowed by BTC, the first cryptocurrency in the industry.

Unfortunately, the change of this situation is progressing slowly due to the development of the market. We can explain this with an analogy. Honey; is just a product of bee. However, the bee; It is indispensable for the continuation of life. Blockchain technology; represents bee in this relationship. Honey represents cryptocurrencies. The situation underlying the problem is; the vast majority is focused only on honey. As a technology, Blockchain is undoubtedly innovative and revolutionary with great opportunities; it creates a revolutionary creative effect in many areas and thus a positive evolution. As Intexglobal, we surely welcome this destructiveness with affirmation. History has repeatedly shown us the irresistible destructiveness of the new in these times of change and transformation. We are aware that our future will change similarly thanks to blockchain. As Intexglobal, while we are determining the content of the problem ; We would like to point out that we are more focused on the lack of blockchain technology in its uses and possible solutions than technical problems such as code and network security. Thousands of experts are making efforts to make blockchain technology more functional and more advanced. Thanks to these valuable efforts, direct user-oriented solutions like us create a reliable background. As a result, it is already time to save Blockchain technology from the shadow of only one product, cryptocurrencies, and dazzle in its own light.

Intexglobal, as an ecosystem of solutions for the areas in life; It makes a significant contribution to transform Blockchain into a solution tool that touches everyone.

## 2. THE PROBLEM OF THE CRYPTOCURRENCY ECOSYSTEM

The main problem of cryptocurrencies; Despite the use of money in their names, they are unable to act like a money. Even though they are not used in shopping and commerce even though there are thousands of cryptocurrencies, it is a big problem alone.

The money of the internet should have been used at least in the internet trade. It is a clearly known fact that cryptocurrencies acting with buy-sell only on crypto exchanges cannot have a future. This situation is also a risk for exchanges. Unfortunately, cryptocurrencies, which have turned into a tool to make the dream of getting rich the shortest way, make the entire ecosystem unsafe. A sustainable solution cannot be produced in environments where there is no trust or decreasing.

- Besides the trust and change paradigm brought by blockchain technology, it is an important problem that cryptocurrencies turn into such an unreliable and manipulative product.
- Although cryptocurrencies are not inflationists, the most important difference from the nominal money produced by states is that the most common cryptocurrencies that experience depreciation of up to 90% in short periods are among the main problems for the ecosystem.
- Moreover, despite the fact that cryptocurrencies are an alternative to the current monetary system and even an axis correction administration, this situation that it is in now is an important and pending solution.
- Transformation of cryptocurrency exchanges into a manipulative environment is also one of the main problems. This is a major obstacle for the ecosystem to mediate and produce solutions that touch life. How will a stock market full of untreated cryptocurrencies survive and sustain in a competitive market? It is important to reposition exchanges about this problem.
- It is another problem of cryptocurrencies, which is produced by saying that "they are producing solutions" and in truth they does not actually have any effect is a sad reality.

Negative results of cryptocurrency mining;

- The idea of mining was perceived as a fair and beautiful solution in the early years. But today, this is the case; turned into a big, destructive ball of trouble. We predicted this situation 5 years ago.
- Designed for an ecosystem that is decentralized and can be attended by everyone; it's become a race where big miners and hardware manufacturers make a definite profit. As a result, the lack of centralization; Over the years, we've been watching together how it's lost. This also led to a number of risks, such as a 51% attack on blockchain networks. Many parts, the prices of which increased as a result of demand for the equipment, brought an extra burden and problem to the market. It has become extremely dangerous with mountains consisting of broken devices and huge environmental impact for our world.
- Another important reason why cryptocurrencies cannot turn into a payment instrument is; is that miners turn to cryptocurrencies with higher commission rates or more valuable. Therefore, transfer times are prolonged; sometimes it takes hours or even days.

If we give an example; You have eaten your meal and you have to wait tens of minutes to pay your money at the checkout. Think about how devastating this problematic situation can turn into a problem.

- One of the main unforeseen problems with mining is; is an increasing energy need with each passing day. This need came to such a level that; Over time, it exceeded the total energy needs of many countries. The fact that some miners who want to reduce their costs continue these activities in illegitimate ways ( like using the computers in our homes , using the computers in the universities or even using the supercomputers etc ) makes the sector disreputable.

With the new crypto money production methods, environmentally friendly and low energy vehicles are being developed. The current situation, however, is a major problem for the ecosystem. More than 159 countries spend energy just for Bitcoin mining; The energy consumed by countries such as Ireland, Croatia, Serbia, Slovakia and Iceland has already passed. On the African continent, only 3 countries consume more electricity than bitcoin. These are Egypt, South Africa and Algeria. Not only African countries, bitcoin consumes more electricity than Ecuador, Puerto Rico and North Korea. Power Compare states that the annual estimated electricity consumption of bitcoin is 29.05 TWh, which is equal to 0.13 percent of the world's total electricity requirement. If Bitcoin miners come together, they may be the 61st most consuming country in the world in terms of electricity consumption. By the exponentially increasing energy need, in February 2020, it will be more than all of the world's energy needs. Another interesting research result of Power Compare is that this energy requirement spent so far is worth 1.5 billion dollars at the lowest cost.

### 3. PROBLEMS IN AID AND DONATION ACTIVITIES

The general situation of the donation sector and the problem of trust;

According to the data announced in the last four years we examined; While the rate of trust in aid organizations decreased in 45% of the society, it increased only in 5% as general.

Looking at the results of social studies, against aid organizations; They stated that their trust decreased when they did not act financially, did not adhere to their values and could not show a significant effect. 62% of the people who experience loss of trust; They state that the aid organizations' reputation problems arising in the media and other social channels, wrong business policies, spending fund distribution to the organization expenses rather than aid, and finally, their trust decreased when they were of a different character than they showed.

Another big reason covering 60% of the trust problem; It is stated that a large part of the aid amounts of the organizations are lost within the establishment expenses (salaries, rents, logistics, promotion, maintenance, etc.) and as a result they do not have sufficient effect. Unfortunately, the situation of reassurance does not change in charity activities formed by official charities, private institutions, foundations and religious communities.

When the events are approached through the eyes of the donor, this means supporting an institution they cannot trust and staying alone with a feeling of being stuck between his conscience. Unfortunately, very large aid organizations are unfortunately unable to achieve the expected effect. Even if we put aside the costs of access to aid with its operational and personal expenses, the uncontrollable situation in the large structure causes great misconduct. As a result, "help" as a case will always experience these problems regardless of whether it is private or institutional due to its current structure and functioning mechanism. The solution basically requires paradigm shift. You cannot go to a different address by following the same path.

## Collecting and distributing donations with traditional methods brings important problems.

## Individual Donation and Philanthropy

Donation and philanthropy roles vary from country to country. The cultural structure of societies, socio-economic levels, social welfare, state models and taxation rules are the most important factors in this differentiation. However, despite all this differentiation, the concept of donation appears in two forms: individual aid and public benefit foundations. When we look at the adult population of the donations made to GDP ratio in the country, the US is 1.5%, while in European countries this rate is 0.2%, and remains at 0.06% in Turkey. It is remarkable that Switzerland, Sweden and the Netherlands, whose GDP is higher than other European countries, are at the end. Although the donor adult population in these countries is high, the ratio of donation to GDP remains low. The most important reason for this is that social inequality in these countries is relatively low compared to other countries. As a result, more social inequality in a country or region and more exposure to vulnerable people is one of the most important factors for the rise of social solidarity. Among the primary reasons for Europeans to donate are social welfare, international assistance and religious factors. Although these vary from country to country, these three factors enable people to choose which institution to donate. International and humanitarian aid are seen as the primary priority in Germany, Belgium and Sweden. However, the increase in social welfare is the top priority for France and Spain's vulnerable citizens. In England and the Netherlands, religious factors take precedence. Donors make their donations according to these perspectives. Advantages such as tax cuts provided by the government in Europe encourage donations and people.

## Sum of individual donations by country (million euros)

### Participation rates of Top 10 countries in the money donation

Country	Rank	People (%)
Myanmar	1	91
Indonesia	2	79
Malta	3	73
Iceland	4	68
Thailand	5	68
New Zealand	6	65
Netherlands	7	64
United Kingdom	8	64
Austria	9	63
Canada	10	61

### Helping rates of Top 10 countries to foreign people

Country	Rank	People (%)
Sierra Leone	1	81
Iraq	2	78
Libya	3	77
Kenya	4	76
Liberia	5	75
Kuwait	6	74
ABO	7	73
Uganda	8	73
South Africa	9	72
Saudi Arabia	10	71

### Foundations and charities working in the public interest;

While there are around 100,000 foundations in the USA, there are about 107,000 public benefit foundations in the European countries where the investigation is conducted. (There are close to 130,000 foundations across Europe.) The foundation has a total of 3,320 units in Turkey. Germany ranks first with 19,150 institutions. Poland is in the second place with 15,778 institutions and Spain with the number of 14,196 institutions in the third place. Charities in Europe are on average 20 to 30 years old. The number of foundations and charities increased rapidly with some legal and economic reforms and laws enacted in 2000s in the mentioned European countries. Throughout Europe, 30 foundations fall for every 100,000 people as evidence of philanthropy and donation. However, it should not be forgotten that this figure varies according to countries and regions within countries. For example, there are only 6 foundations per 100,000 people in France. This figure lags far behind the average figures. Likewise, there are obvious differences in east and west in Germany. We can say that many factors such as the development times of the foundation sector in the countries and the social economic levels of the regions played a role in the differentiation of this distribution. The total value of the public interest foundations and capitals of the foundations in the European countries examined is 426 billion Euros. Annual expenditure totals of public benefit foundations in the countries studied are estimated at 54 billion Euros. The priority of foundations in Europe is generally health expenditure.

## Donation foundation amounts by country

### The negative impact of aid on local and regional trade:

It is known that big charities, including Unesco, are competitors to the trade in places where aid is provided with occasional aid. Negative effects of local trade and naturally competition cause great reactions. Even this shows that a permanent and sustainable solution cannot be achieved with today's understanding of aid. For example, before a global aid organization takes aid to an area in Africa, it receives preliminary information from the field agents on how assistance should be. Then, in line with this information, needs and costs are planned. Then, how and with whom the assistance will be delivered is planned. If all goes well, even the first party will take months to get help. When help arrives on the field, a bigger problem arises, which is a security problem.

There are many situations in collective aid that lead to unsolvable problems. It is the community that receives help to feel themselves under pressure in many political, religious and similar matters. Regardless of the form of the help, unfortunately feelings of dependence and helplessness in the individuals and communities in need of help cause mental problems and many social problems. Many institutions, from universities to the world health organization, are struggling to heal these wounds, but since they do not find a solution at the source of the problem, all the problems that continue to arise and continue are increasing. With this pandemic, this bad situation has once again manifested itself with all its nudity. The solution to this problem has not been achieved yet.

Generally; It is necessary to understand the basic paradigm and functioning errors of the world trade volume reaching 350 trillion dollars to the problems deepening with poverty and especially with the pandemic. Problem; It is not an act of helping but increasing areas that need help day by day. The existing aid mechanism; it is not functional enough. While the number of aid programs that Unesco canceled because it could not receive the funds, the number of people who need help continues to increase exponentially. This situation must change radically. The solution to this bad trend has not been found yet.

What is so striking and so sad is the statement of the President of the United Nations. It is a painful fact that more than 30% of the \$ 193 billion aid fund collected has been destroyed for various reasons and that there are terror, piracy, transportation and planning errors. As can be understood from all these details, it is an urgent need for a radical change in the field of aid with a new paradigm.

# Solution

With our blockchain-based trade-based projects, we are launching sustainable solutions to reduce inequality, hunger and poverty in the World.

In line with our targets, we started to establish the main backbone by taking a first step in 2016 by designing a new ecosystem for the problems that need to be solved. We have been developing and operating the entire intexchain ecosystem in harmony for about 5 years. Intexglobal LTD has reached a series of solutions that we all need by combining the methods that it has developed and has proven itself from past to present. We begin to present our contribution to how to solve the problems we mentioned at the beginning.

We will deal with solution subjects separately, just like in the problem section. With this method, we will explain our solutions according to their internal operations and hierarchies, just like in problem areas. By gathering all our projects under our INTEXCHAIN ecosystem, we will reach a powerful solution tool that complements each other and establishes a symbiotic relationship.

The main topics of our solutions, which we will explain in order, are as follows;

**INTECOIN:** It is the cryptocurrency of our entire Intexchain ecosystem. It is the basic money solution of our community. Produced on the ERC20-Ethereum based blockchain main network. We will present the details in the INTECOIN header.

**INTEXPAY:** It is a payment solution. Intecoin will be used in the first place. In the future, we will be able to add other cryptocurrencies, and we will discuss the payment solutions of our ecosystem under the heading of INTEXPAY header.

**ACCEPTANCE POINTS:** We will examine our traders and vendor using Intecoin as a method of payment, and their details as Acceptance Points in the ACCEPTANCE POINTS header.

**INTEXPPLACE:** It is our e-commerce portal. It is the first trading platform using Intecoin. It is our internet based solution where our ecosystem will trade 24 hours a day. We will transfer the details under the header INTEXPPLACE.

**INTEXPCHARITY:** It is our world's first trade-based life support platform, where assistance is transferred to those in need directly and based on sustainability. This platform, where we will provide solutions to homeless people in the first place, is a first in its field with its transparent and instantly traceable structure. We will present the details in the INTEXPCHARITY header.

# Intecoin

***"WE ARE BUILDING THE CURRENCY OF OUR FUTURE FROM TODAY."***

INTEXCIN is a cryptocurrency created using the ETHERIUM-ERC20 INFRASTRUCTURE. Intecoin is the main and unifying element of all projects of Intexglobal. Intexglobal will continue to support Intecoin with new projects as well as existing projects to make its life cycle sustainable and continuous.

## **Why was it produced and what is its function? ;**

It is the only cryptocurrency that the user can both trade and earn spiritual earnings by helping others while making profit. It is also an investment tool that will profit its investors. Intecoin is a currency that benefits humanity wherever it is used. It is a currency in which all users can carry out activities to keep the ecosystem alive for economic freedom and a sustainable life.

For intexcharity, the most important solution of our ecosystem, we had to produce a model and prove its functionality in the first place. This necessity is the most basic element in making our own currency. In addition, we could not make the technical integrations we would need with a currency that was outside of our control for the continuous support project for help. A digital asset that is open to development is one of the most important solutions in terms of the operation of the project.

**Is there a limitation in possessing Intecoin ?;** Users have the right to have and transfer as much intecoin as they wish. This is a natural imperative for trade to occur. The voluminous trade to be made with a limitation could be interrupted. Intecoin will be used as a coin and there will be no restrictions on its users. In this way, we will be able to attract large communities to our ecosystem.

Ödemenizi intecoin ile yaparak bir ihtiyaç sahibine yardım edebilirsiniz.

With Intexpay, users will be able to use the products and services they wish in registered merchants in their needs using intecoin and then other cryptocurrencies. Users can easily access the products and services they need by accessing a list of traders in their location with the merchant map on Intexpay. This feature will positively contribute to the business of traders and support the growth of our community. For now, we have withdrawn our testing applications for improvements. We are currently running renewals and updates to add ERC20 based intecoin. Upon completion of the processes, current versions will be uploaded to apple store and google play.

In this way, they can be used both in our existing traders and in all our traders to be added in the process and in coffee vending machines. QRcode and RFID cards will be able to pay at intecoin acceptance points. Commissions deducted from all expenditures and transfers made with Intexpay will be automatically transferred to the Intexcharity pool. For all transactions, 2% commission will be deducted and 80% of this commission will be transferred to intexcharity and the remaining 20% to the intexglobal ltd wallet as a service fee and income. In addition, those who wish on intexpay will be able to donate to intexcharity.

Intexpay will be open to new and private donation organizations and will be able to start new donations. All donation projects will use intecoin as a starting point. According to the growth and demands of the ecosystem, BTC and other cryptocurrencies will be added to intexpay. 2% service commission will be taken from new donation organizations and 80% commission will be transferred to intexcharity and the remaining 20% will be transferred to the account of intexglobal ltd as income.

# Inteplace

Inteplace opened in May 2016. It is the first shopping portal in the C2C infrastructure where secure trade is done using only cryptocurrency. The sale of tens of thousands of products and services with more than 1000 virtual shops took place in the secure trading environment offered by inteplace.

Pandemic brought many trades and businesses to it's finishing points. It pointed out that trading on the internet would further develop as a necessity. In the future, it will be an e-commerce portal where many different currencies can be used by adding some reliable cryptocurrencies and country currencies such as Bitcoin and Ethereum on Inteplace.

## **INTEPLACE REVENUE MODEL;**

Starting fee will be charged in various categories according to the usage requests from the virtual stores to be opened by the sellers. 10% commission will be charged from the sales. 70% of these commissions will be transferred automatically to intexcharity and the remaining 30% will be transferred to the intexglobal LTD wallet as income. Inteplace virtual shop subscription will be charged at certain periods just like similar platforms. In addition, ads will be added to the portal and additional revenues will be provided. Inteplace has a modular structure. Traders who wish will be able to increase their special campaigns and sales by purchasing these modules.

Starting Trading at Inteplace; Users who will sell the product must be a member of Inteplace first. They can rent their virtual stores by choosing the time they want to trade (such as 1 month, 3 months, 6 months and 12 months). Trade begins after payment confirmation. After the membership approval, they can open their virtual store using a name and logo of their choice. They will upload all descriptions and images of the product they will sell to their virtual stores. They will be required to enter all data regarding cargo, and delivery from the very beginning. For now, they can only sell with intexcon. They will be able to freely choose which currency they will sell in the future or how much they will use cryptocurrencies proportionally. With the new features to be developed, inteplace will be an important tool in the sector.

Buying products from Inteplace; Users in the receiving position can freely browse the portal before shopping. When they want to shop, they have to be a member of the inteplace. For shopping, they will be able to put their products and services into their baskets by using the search engine on inteplace or browsing through stores. will complete their purchases by performing payment transactions with Intecoin. With many cryptocurrencies and government money that we plan to add in the future, we will attract large audiences to the inteplace.

## **How is safe trade (ST) done?**

As it is known, all cryptocurrencies work one-way. Because of these features, they are used in trading, either at the acceptance points, which are the only vendor, or in virtual stores that are also the only vendor. We have developed an important solution in this regard. In this way, we achieved a first by applying GET both at reception points, vending machines and on inteplace. By building our investors intecoin wallets in our portal, we have created an infrastructure just like a bank. Traders and buyers can create personal wallets on the Portal and use as many intecoin as they wish.

When the buyer wants to buy a product using intecoin, the price of the product he wants to buy is checked by the system and blocked as much as the price of the product he wants to buy. After the product is paid by the buyer, the product is delivered to the user by the seller. After the buyer approves the system that the shopping is completed, the commission to be transferred to the intexglobal commission and intexcharity, is deducted from the money held in the

payment pool and the price of the product is automatically transferred to the seller account. In addition to the transaction fee arising from the purchases made on the intexplace, they can also make donations as much as they wish to the charities they have chosen upon the request as the buyer and seller. In this way, direct donation is transferred to people in need of help through intexcharity. Intexplace is not only a trading portal but also an important part of a large and sustainable donation system. Intexplace is a first in the blockchain ecosystem with its SEC (Secure E-Commerce) system and donation cycle.

# Acceptance Point

Our acceptance points are one of the most important pillars of the intexchain ecosystem. In this way, intecoin will become a part of our daily life by performing its function as a coin. Commissions obtained from the trade to be created thanks to our acceptance points will be transferred directly to intexcharity, a part of our ecosystem, and a continuous life support will be provided to those in need. We will also share your business promotion and location information on our web pages and in our payment tool, intexpay. In this way, we will create an important opportunity for our traders to gain new customers.

Intecoin acceptance points have been created in many countries and their number is increasing day by day. Traders who want to be the point of acceptance will create their wallets by registering for free via the intecoin portal. They will stick the stickers they have downloaded from our portal to their visible locations (such as doors, showcases, etc.).

A registered trader will be able to join our trade pool by filling out the mandatory fields such as country, location and service content, web address, transportation and contact information via the portal. In this way, intecoin owners will have access to the information about where and which merchant they need, on the intecoin portal and on intexpay.

For payments made from all acceptance points, the product price will be transferred to the merchant. 80% of all transaction commissions to be received as service providers will be transferred to intexcharity and the remaining 20% to intexglobal company as income.

Sample commission distribution; \$1.6 of the \$2 to be taken as a 2% commission from a \$100 trade will be transferred to the intexcharity pool and \$0.4 in revenue to intexglobal ltd. In this way, while the intexcharity pool fills up

### Merchant agreements;

These agreements will be made in two ways, standard and private. Standard agreement is to ensure that all payments made through intexpay are determined at a service cost.

Our aim with the special agreement is to increase the commission rate in the standard agreement depending on volunteering. In this way, more benefits and needs in donations to Intexcharity will be able to bring more help to the people who are in need.

With these agreements, it is to determine a service fee that will be collected from all trade payments to be made using Intexpay. This is an agreement similar to the commissions that banks receive with Visa Master. Agreements will not create any additional costs apart from determining the commission fees to be charged. The merchant can withdraw from these agreements unilaterally at any time.

## Become an Intecoin acceptance point and intexcharity member

Joining is free

Your brand is listed on our website to contribute to your brand awareness

Ease of contactless payment with qr code system

Reach potential new customers

There is no extra device cost

Be part of a worldwide charity project

internet connection is enough to get payment

**For detailed information and to participate**  
[www.intecoin.io/acceptancepoints.html](http://www.intecoin.io/acceptancepoints.html)

# Vending Machines

At the vending machines of partner companies will be able to purchase products with intecoins by using QRcode and RFID card and the service fee to be taken from these points will be 2%. 70% of this service fee will be automatically transferred to intexcharity and 30% to the intexglobal wallet. The location information of the vending machines will be accessed through the intexpay merchant map and the intecoin portal, and the ease of use and spending will be provided.

What does Nayax integration mean? Thanks to our solution, coffee can be obtained via intexpay using both RFID card and QCODE using intecoin. In this way, wherever coffee is sold in the world, Nordic Drink takes all its earnings into their wallet instantly without time and bank constraints.

Nayax is a technology that can be used almost anywhere where payment solution is required. It is a company with global solutions regardless of the sector. With Nayax, the main partner in payment

solutions, we successfully resolved Nordic Drinks' coffee sales on vending machines with intecoin. We drank our coffees by paying with an RFID card that we made as a demo, which works just like a credit card and using intecoin by touch / pay method. Perhaps this solution was a first as a method in the world.

With this integration, we got the opportunity to prove the strength of our infrastructure once again by participating in this large backbone, which is a solution partner in visa and mastercard. This cooperation has also made the infrastructure for them to trade with intecoin in our new partners. Wherever they are in the world, all our partners who will integrate into the intecoin ecosystem will now have the convenience of getting their after-sales money in their intecoin wallets instantly, without a bank and time constraint.

# Intecoin ATM's

Necessary negotiations were held with Generalbytes, the world's largest cryptocurrency ATM manufacturer. Intecoin will be integrated into all ATMs produced by Generalbytes. Also, if we demand, intecoin ATMs will be produced in the design we want and installed in locations we deem appropriate. Thanks to ATMs, cryptocurrencies will provide access to cryptocurrencies just like banks. Intexglobal will increase such integrations in the future and we will also implement new and easy solutions in line with the needs of our ecosystem.

For this purpose, we have completed the intellectual and technical background of a project that we have kept secret. We can already foresee that our community will expand when we bring our idea to life.

# Intexcharity

## The world's first direct aid project which provides aid

With Intexcharity, we reach directly to the needy.

As a result of your shopping on the Intecoin e-commerce platform [intexplace.io](https://intexplace.io) or the purchases you made on vending machines and acceptance points with [intexpay](https://intexpay.io), the transaction fees are transferred directly to the Intexcharity donation platform without any interruption and the donations accumulated on the platform at the end of the day are sent to all intecoin wristbands.

Wristband owners can shop at vending machines and acceptance points with intecoins accumulated in their wristbands. Transaction fees resulting from this purchase are transferred to the donation platform and this cycle continues continuously. Apart from this cycle, the support from donors will gather in the Intexcharity pool and expand our aid capacity.

In addition, intexcharity, which is open to the contributions of donors, will grow depending on the valuation and use of intecoin, and will be a powerful tool in solving an important social problem. RFID wristbands will be used in intexcharity, which has a very simple operation, due to the ease of use and installation. Depending on the development of the opportunity and technology, new tools will be included. With RFID wristbands, intecoin within the daily limits and as much as the part spent will be sent automatically to those in need from the intexcharity pool.

In this whole process, there is no sharing of information between the recipient and the issuer, except for the distribution of the wristband, and will remove the honorary and social pressures on the receiving. Thanks to the intexchain ecosystem, the parallel approach with the UN's 17-item targets will be provided by contributing to the continuation and development of regional trade, thanks to the intexchain ecosystem, in the continuation of assistance and in meeting personal needs. Intexcharity will become an important life support organization. Each institution can start its own aid organization over intexcharity.

It will be transferred to the intexcharity pool by taking a commission attached to the support for intexcharity from those who are organizing aid by using our platform. The whole process will be available on the public intexcharity website.

Information about who will be given the Intexcharity bracelets will be obtained from the official institutions of the countries and reputable trusted charities. The needy that are monitored daily by our volunteers will be reached through social layers. Anyone who wishes can become an Intexcharity volunteer by registering the workspace free of charge on the portal. In this way, both the community will grow and contribute to the management of the whole process. Charity activities and organizations are broadcast on media and press media, with attention to intexcharity and intecoin. Contribution will be made to the development of our community and to the increase in value of the use of intecoin and to the development of trade.

Depending on the meetings carried out with the UN, international support to the ecosystem and, most importantly, sustainability and trust will be provided in pilot countries and locations by working with the UN.

### **How to use Intexcharity wristbands:**

These are special wristbands with NFC features and a unique identification number distributed on the Intexcharity Direct Donation platform. These bracelets are activated automatically when given to a needy. Some of the donation collected from the Intexcharity Direct Donation platform is transferred to the active wristband at the end of the day. The intecoin collected on the bracelets can only be used for shopping. Intecoin transfer cannot be made with the wristbands.

Donations can be accumulated up to a maximum value in the wristbands. The value of intecoins transferred to the bracelets will be determined by the countries and regions where the bracelets will be used. In this determination, the amount required for daily need will be determined by the information obtained from local regions.

When the amount transferred to the bracelet reaches its maximum value, the donations transferred to that bracelet will be stopped. Donations continue to be transferred to the bracelet the next day when all or part of the intecoin on the bracelet is used. The amount to be transferred is the part spent daily depending on the upper limit determined.

Some of the transaction fee that occurs when you spend with the bracelet is transferred to the Intexcharity Donation Platform again. This cycle continues as the wristbands continue to be used, thereby contributing to the donation platform.

At the same time as this method and processing mechanism we have developed, we can also form a basis for world citizenship salary proposals spoken by many famous people these days and a permanent solution can be reached.

Exchanges made with wristbands and wristbands can be followed instantly through the intexcharity platform. In a transparent structure, all transactions can be monitored instantly from our web pages. In a possible abuse, it can be reported to intexcharity support teams through the merchant in which it was used. In this way, the wristband that is being abused can be blocked and decommissioned. These methods will be replicated when the process starts.

# Trade Based Sustainable Endless Donation Cycle

- Blockchain technology and AI-powered security.
- Planning, monitoring and reporting of the whole process.
- It is transparent, all donations can be monitored instantly,
- Creation, distribution and tracking of donation wallets (wristbands).
- On the platform, individuals and NGOs can start a donation campaign.
- Integration with institutions such as the UN, Unicef and NGOs.

## INTEXCHARITY VOLUNTEERS

An approved person can be an Intexcharity volunteer. All our investors, traders, partners etc. We can touch the lives of many people by increasing the goodness. Since we plan to continue our activities without creating a cost unlike most of the other aid institutions, the collected aid will be delivered to those in need through our volunteers without any interruption. They will only give intexcharity bracelets to designated people, and this will be once for every needy. This will also support social psychology, as it will not create social

and honorary pressure in need. Thanks to our volunteers, we will provide a rapid spread all over the world and we will prepare the ground for the subsequent processes to proceed spontaneously. The identity information of our volunteers will be shared upon the request of the official institutions of the region where they work. This sharing is for both their safety and their contribution to their ability to work more comfortably.

### Intexcharity activity and interaction reports;

All activities and processes on intexcharity and the amount of aid can be monitored instantly from our worldwide open portlets. With the addition of artificial intelligence systems, processes will be made as independent as possible and possible abuses will be prevented. In this way, we will collect useful data such as country, location, amount of aid, trade areas where aid is used, and the variety of needs, as much as the law permits, and provide useful analysis. Thus, the diversity of needs and the status of regional trade will be a product that can be given to governments and institutions that want it within ethical and legal rules as an important data. It will be offered especially to the use of the academic environment at no cost. If deemed necessary, the data will be shared in exchange for help to intexcharity.

In all this process, intexcharity plays a revolutionary role. When this platform, which is open to advanced architecture such as blockchain and artificial intelligence, starts to work, the world will no longer be the same. Aid organizations will either evolve or collaborate against this platform, which is transparent, traceable and secure with blockchain. No charity will be indifferent to this platform.

We will change the name of the aid all over the world. Now the aid will be referred to as "LIFE SUPPORT" and transformed. Using this problem-solving platform for homeless people in the first place will become a useful necessity for all charities. In this way, while maintaining the prestige of the money that goes to help, we will also increase the value and trade of intexcoin and ensure a rapid and sustainable growth. Every project in our ecosystem will make a great contribution to each other and help make our world a more livable place.

# REVENUE MODEL

## INTEGLOBAL'S REVENUE MODEL AND SUSTAINABILITY

Intexglobal is a technology company. It earns income from the projects it does. Some of the rental revenues, advertising revenues and commission fees arising from the use of the service we provide with Intexplace, and some of the commission fees to be obtained with Intexpay constitute the revenues of our company. Depending on the listing of intecoin on the stock exchanges, and then on IEO, a large portion of the Intecoins in our stock will provide capital support as needed. The company aims to produce new products and services, to make new collaborations and to profit from all these activities with its existing experience and technical capacity. Intexglobal will retain some of its earnings as capital for all cost and future goals of the company. The remaining part of these earnings will be transferred to the areas needed through Intexcharity, at an increasing rate depending on its continuity and profitability. All of these activities are designed in a transparent and traceable structure.

### New projects are on the way:

In order to support and develop the ecosystem, our projects for various fields such as games and tourism are ready. We plan to achieve the jobs we have in the first place, and then to start new projects that are even more powerful. Progressing step by step, we will expand the intexchain ecosystem with new collaborations in the areas we target. While these activities will earn profits to our investors, we will also offer solutions to many social wounds, especially homeless people, through intexcharity.

## Revenue Model

## OUR COMPETITIVE ADVANTAGE AND STRENGTH

We are very strong in terms of competition, as we have identified a lot of problems from cryptocurrencies to charity activities and we have built an ecosystem for solution. The entire ecosystem is mobile as a symbiotic life network, with many areas both inside and outside. In this way, we are working towards cooperation and solution together rather than a competitive struggle.

INTEXCHAIN is an ecosystem that envisages cooperation in almost every field. We are a tool in which cryptocurrencies outside of us, as well as state-owned funds, as well as all charities can be integrated and used with us. We specifically designed this structure in this way. We wanted to be an ecosystem that could include and cover all rather than a competition with the existing. This is an approach that will continuously expand our cooperation and capabilities.

We will be able to make intexcoin one of the most important currencies of the future and the Intexchain ecosystem as one of the largest communities by enlarging the benefit and opening it to everyone.

As a solution and answer to our criticism about cryptocurrencies not acting like a currency, we have designed intexcoin as a tool of trade from the first day. We made it available both in our e-commerce portal intexplace and in shopping at our acceptance points. Thousands of products were bought and sold. We made intexcoin a real money in a closed ecosystem and spread to 97 countries in this process. In many countries, we were able to create users and commercial spots. Our work continues increasingly.

## Simulation on the effect of the ecosystem by annual use

	1th Year	2nd Year	3rd Year	4th Year
<b>Intexcoin Value</b>	50 cent	1.5 \$	5 \$	10 \$
<b>Circulating Intexcoin</b>	1 Billion Units	2 Billion Units	7 Billion Units	18 Billion Units
<b>Total Value</b>	500 million \$	3 Billion \$	35 Billion \$	180 Billion \$
<b>Commission Rate</b>	% 2	% 2	% 2	% 2
<b>Donations from the Commissions</b>	25 Million \$	60 Million \$	700 Million \$	3.6 Billion \$
<b>Total Annual Per Homeless</b>	8*365=2920 \$	8*365=2920 \$	8*365=2920 \$	8*365=2920 \$
<b>Number of Homeless People Receiving Annual Donation</b>	8561 Person	20.548 Person	239.726 Person	1.232.876 Person

# OUR PARTNERS

We will implement the principle agreements we have made with our partners in the coming days. Our current partners and future partnerships will expand the capabilities and impact of our Intexchain ecosystem. Partnerships were one of the most important tools to combine the experience of our partners in different sectors from many countries and the power of their communities, and bring them to useful and successful solutions for the parties. We have always been open to collaborations that will contribute positively to our brand value and awareness. In this way, we will increase our influence on social areas and support the valuation and use of intecoin.

## Cryptocurrency exchanges we currently listed on

# INTECOIN TOKENOMY

By using the distribution of Intecoin tokens whose details are given below, a finance model was created for the development of our company from today to the future. The success of this financial modeling we do depends partially on our IEO and listing performance. The financial strength to be gained, as we have developed all our projects for a long time and have completed most of them, will support new team members, corporate identity and expansion in continents and countries. In addition, there will be financial support for the introduction and start of our new projects that we plan.

Revenues of the works we will do in our areas of expertise and financial supports that may consist of new partnerships and possible project partnerships are not included in this calculation.

**Token name:** INTECOIN  
**Symbol:** INTX   
**Digit Value:** 9  
**Digit name:** MINTEX  
**PROTOCOL:** ERC20 / ETHEREUM  
**Total Produced:** 600.000.000 INTX

**Smart contract**  
0x7533D63A2558965472398Ef473908e1320520AE2

## Intecoin Distrubition

-  **IEO** - 200 million INTX
-  **Company Assets** - 170 million INTX
-  **Intexcharity Wallet** - 70 million INTX
-  **Investors** - 50 million INTX
-  **Institutionalization** - 50 million INTX
-  **Advertising Marketing** - 40 million INTX
-  **Team and Consultants** - 20 million INTX

# ROADMAP

In the past 5 years since January 2016, we have implemented many activities with our sites and our token we use for testing. With these new collaborations, we have created our acceptance points in nearly 100 countries and reach new investors by ensuring the growth of our community.

Now we are getting ready to open all this infrastructure to the world with IEO and listing process.

We have a very long way to walk and a lot of work to do together.

2016, JANUARY - ESTABLISHMENT. INTEXGLOBAL WAS FOUNDED.

2016, JUNE - INTEXPLACE. INTEXPLACE PLATFORM STARTED WORKING.

2016, JULY - NORDIC DRINKS. WE BROKE NEW GROUND IN THE WORLD WITH OUR COOPERATION WITH NORDIC DRINKS AND NAYAX COMPANIES THAT PRODUCE COFFEE VENDING MACHINES.

2016 SECOND QUARTER - PROMOTION AND INVESTOR MEETINGS WERE HELD IN MANY CITIES AT HOME AND ABROAD.

2017, JULY - OUR FIRST OFFICIAL OFFICE IN PAKISTAN IS OPENED IN ISLAMABAD.

2018 FIRST QUARTER - INTEXPAY AND INTEXCHARITY PROJECTS STARTED TO WORK.

2019 1ST AND 2ND QUARTER - MANY PARTNERSHIP AGREEMENTS HAVE BEEN MADE SUCH AS ORACLE AND GENERAL BYTES.

2019 3RD AND 4TH QUARTER. - NEW PROMOTION MEETINGS WERE CONTINUED BY THE DEVELOPMENT OF ALL THE STRUCTURE.

2020 QUARTER 1. - NEGOTIATIONS STARTED WITH STOCK EXCHANGES FOR IEO AND LISTING.

2020 QUARTER 2. - IEO AND LISTING. EXPANSION OF THE COMMUNITY AND INCREASING THE NUMBER OF ACCEPTANCE POINTS.

2020 QUARTER 3. - CREATION OF THE APPLICATION AND RFID BRACELETS FOR PAYMENT TOOLS AND AID SYSTEM AND CHOOSING THE REQUIRED PILOT REGIONAL STUDIES AND OTHER REQUIRED STUDIES FOR THE APPLICATION OF PROJECTS FOR THE HOMELESS WITH THE SUPPORT OF OUR AID VOLUNTEERS AND ACCEPTANCE POINTS.

2020, FOURTH QUARTER. INTEXCHARITY DIRECT CONTRIBUTION ACTIVITIES WILL BE LAUNCHED AND NEW PARTNERSHIPS WILL CONTRIBUTE TO GROWTH.

2021 QUARTER 1. - EXTENDING THE SCOPE OF INTEXCHARITY AS A PORTAL BY PROCESSING THE DATA COMING FROM THE FIELD INTO MEANINGFUL REPORTS.

2021 2ND QUARTER. - COOPERATION WITH BIG AID INSTITUTIONS AND GIVING THE OBTAINED DATA IN RETURN FOR SUPPORT TO THE DESIRED STATE AND INSTITUTIONS. IN ADDITION, FREE ACCESS OF ACADEMIC CIRCLES TO THIS DATA.

2021 3RD QUARTER. - TO ENSURE THAT INSTITUTIONALIZATION AND GLOBAL ACTIVITIES BECOME AN IMPORTANT CENTER IN ITS FIELD.

2021 4TH QUARTER. - LAUNCHING NEW PROJECTS AND REALIZING ALL DEVELOPMENTS FOR THE ECOSYSTEM TO FUNCTION AUTOMATICALLY.

2022, 2023, 2024, 2025. - WE AIM TO MAINTAIN OUR PERMANENCE IN THE SECTOR BY DEVELOPING ACTIVE WORKS FOR CONTINUOUS GROWTH.

# OUR TEAM

## Business Development and Finance

**Erdoan Köse**  
Intecoin CEO / Founder

**Bircan Köycü**  
Business Manager

**Kerem Ozan Han**  
Business Development
